NEWSLETTER

JANUARY 2006

CLUB ADDRESS: P.O. BOX 2283, WEAVERVILLE, CA 96093

NEWS OF NEXT CLUB MEETING

The next club meeting will be held on January 11th, being hosted by K6UHS Will and Bonnie at the Granny House, on Taylor Street in Weaverville. Driving west on Hwy. 299, turn right on Court Street, go one block, turn left on Taylor Street, and drive another block west. When you begin to see vehicles with call signs on them, you will know you are there! Hope you can attend, meeting time is 7:30 p.m.

CHRISTMAS PARTY

A great time was had by all who attended, there were 24 members there, and the food and fellowship was great! And the youngsters were delightful, three of which were Jacksons. Crystal came with KD6QBS Vi to help decorate; we always enjoy seeing Crystal. Thanks to her help, and Vi's being able to get there, after utilizing the help of WB6JZN Ed who was also acting as a Quality Baby Sitter for a few minutes until parents arrived for the kids, it was a cheery evening.

Among those attending was WA6BXN Johnny with YL Lois and daughter Kathy. It was so great to see the Weils, we really miss you, and hope the new year will be a better one for you.

The Crazy Gift Exchange was just that! The participants were very graceful. There was a lot of giggling, however.

WEEKLY NET

We are glad to hear KA6ZVR Bob and KD6GCQ Terrie on the Thursday night net. Hope the 146.73 repeater holds up for the net - weather has not been favorable lately. Too much rain, fog, and snow, though we have been hearing the identifier some today.

From KF6OAH Vicki: she saw KF6WLL Ric recently with YL Jeanette. Hope you both will have a good 2006! And the same is hoped for WU6R Bob and N6NOE Virginia, who recently re-joined the club. And a welcome-back to KF6WLO Erik!

COMPUTER STUFF

If you are interested, there are six copies of the Linux Operating System just waiting for you to select one for your use at Budman's Book Mine (we know him as KI6GR). Seems KD6RKJ Tubal donated these items for club members who might be interested. Thanks, Tubal!

FROM KB6YTD Robert:

Club portable repeater (146.835(-) PL 85.4) is now located at the home QTH of W6BVC Tom. Possibly frequency will be changed to 146.880(-) at a later date.
